DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14, 15, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al (Japan 2002-256896). In Figure 9, Yamaguchi et al discloses a throttle body having a throttle valve associated with each cylinder wherein the throttles are connected in pairs, with a separate motor for each pair. The motors are on opposite sides of the throttle body from the injectors. It would have been obvious to one with ordinary skill in the art at the time the invention was made that the use of separate motors would allow half of the cylinders of the engine to pause.

Allowable Subject Matter

Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-10, 13 and 19-22 are allowed.
